Summary

Results-driven Full-Stack Web Developer with hands-on experience in building scalable web applications using modern technologies including Python, Django, JavaScript, and the MERN stack. Proven track record of delivering production-ready solutions during 6-month intensive internship at EuphoriaGenX. Proficient in both frontend and backend development with expertise in RESTful API design, database management, and responsive UI implementation. Passionate about solving complex problems through clean, efficient code and eager to contribute to innovative projects at scale. Strong foundation in computer science fundamentals with continuous focus on learning emerging technologies and industry best practices.

Education

Global Group of Institutions   July 2022 – June 2025
Bachelor of Computer Applications (BCA) - Programming and Coding   *West Bengal, India*
- Relevant Coursework: Data Structures, Algorithms, Database Management, Web Technologies, Software Engineering

Technical Skills

Languages: Python, JavaScript, PHP, HTML5, CSS3, SQL
Frameworks & Libraries: Django, React.js, Node.js, Bootstrap
Databases: MongoDB, MySQL
Tools & Technologies: Git, GitHub, RESTful APIs, Postman
Core Competencies: Full-Stack Development, E-Commerce Solutions, Web Application Architecture, Responsive Design

Experience

EuphoriaGenX   January 2024 – July 2024
Web Developer Intern   *Haldia, West Bengal, India*
- Completed comprehensive 6-month internship program with hands-on training in full-stack web development and software engineering under guidance of industry professionals
- Developed and deployed production-ready web applications using Python, Django, JavaScript, and PHP, implementing RESTful APIs and database management solutions
- Collaborated with cross-functional teams to design responsive user interfaces using HTML5, CSS3, and modern JavaScript frameworks, ensuring optimal user experience across devices
- Participated in code reviews, debugging sessions, and agile development practices, contributing to improved code quality and project delivery timelines

Projects

Full-Stack E-Commerce Platform | *MongoDB, Express.js, React.js, Node.js*   **2024**
- Engineered a scalable e-commerce application using MERN stack, featuring user authentication, product catalog management, shopping cart functionality, and secure payment gateway integration
- Implemented RESTful API architecture with Express.js backend, JWT-based authentication, and MongoDB database with optimized query performance handling 1000+ products
- Built responsive React frontend with Redux state management, dynamic routing, real-time search functionality, and admin dashboard for inventory and order management
- Integrated third-party APIs for payment processing, email notifications, and shipping calculations, improving checkout conversion rate by 25%

Achievements & Activities

Technical Excellence: Successfully completed intensive 6-month industry training program at EuphoriaGenX, mastering full-stack development methodologies and best practices
Problem Solving: Developed multiple production-grade applications demonstrating proficiency in system design, database optimization, and scalable architecture patterns
Continuous Learning: Actively expanding knowledge in cloud technologies, microservices architecture, and modern DevOps practices through online courses and personal projects
